

2026

CATALOGUE

Paper certifications legend

Products with this label have obtained Climate Neutrality, which means that all greenhouse gas emissions generated during the product's life cycle over a given period of time have been reduced and residual ones have been offset.

Products with this label are EU Ecolabel certified, meaning that they comply throughout their entire life cycle with strict environmental protection criteria shared by all European Union countries: reduced water pollution, reduced air pollution, reduced greenhouse gas emissions and low electricity consumption.

The FSC™ RECYCLED label identifies products made with recycled materials. FSC™ certification is promoted by the Forest Stewardship Council™, an international NGO that has been promoting environmentally friendly, socially beneficial and economically sustainable forest management for over 30 years.

Products with this label are PEFC certified, which ensures that the forests supplying the cellulose for the products are managed according to the highest environmental, social, and economic standards.

Products with this label are Cradle to Cradle certified, the global standard certifying that they are made in a safe, circular and sustainable way. Cradle to Cradle Certified® is a registered trademark of the *Cradle to Cradle Products Innovation Institute*.

Products with this label are TÜV AUSTRIA OK compost INDUSTRIAL certified, which guarantees that a product, including components, inks and additives, is biodegradable and compostable in an industrial composting plant in compliance with the requirements of standard UNI EN 13432.

Products with this label are Blue Angel certified, the certification for products and services that meet high environmental, health and performance standards. Products are always assessed from a life cycle perspective.

Products with this label are CHSA certified, guaranteeing that the dimensions and count of every product and other required information is as indicated on the label.

Dispenser certifications legend

Products with this label are ReMade in Italy® certified, the first accredited product certification in Italy and Europe to verify the recycled material content in a product.

Products with this label are TÜV AUSTRIA OK Recycled certified, which ensures that a product's recycled content information is reliable, objective and easily identifiable, as required by EN 15343 and ISO 14021.

Lucart group

Lucart has a history spanning over 70 years, operations in over 70 countries and 12 plants strategically located across Europe. We're Europe's largest manufacturer of MG paper for flexible packaging and one of the top 10 manufacturers of tissue paper. We also produce Airlaid paper and a range of personal care soaps and cleansers, using business practices that are always sustainable. At Lucart we produce 396,000 tonnes of paper and 12 million litres of soap every year.

We have always challenged the **status quo** to make hygiene in the AFH sector **sustainable** and we continue to pursue **innovation** with the aim of inspiring our network to make **more responsible choices**.

Let's make it
a better place ~~net~~

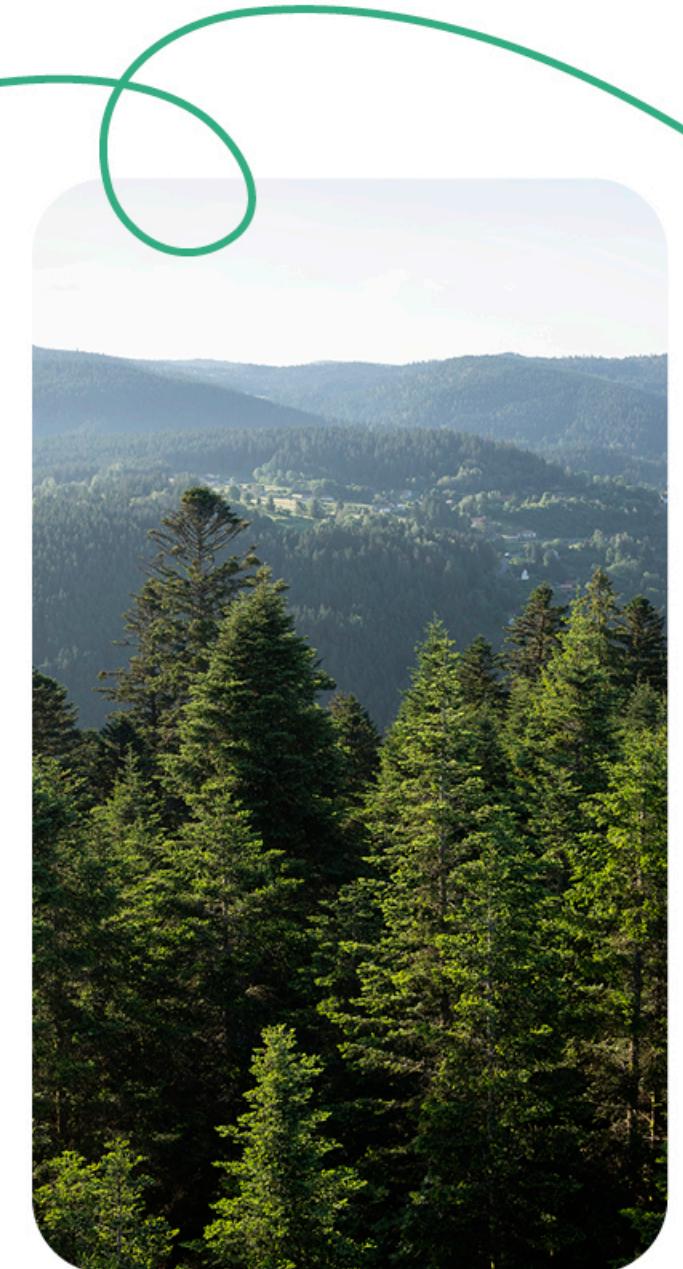

Sustainability drives all our projects...

**We care about people
and the planet**

We bring sustainability into your workplace

in practical ways, with intelligent professional hygiene solutions that redefine the standards of innovation, help reduce waste to a minimum and obtain better results using less resources.

We bring sustainability to the world with paper products, dispensers and soaps certified according to the main international standards, designed and produced to reduce their impact on the planet across their entire life cycle.

... *innovation* turns them into reality

For us, every achievement is a new start

Our innovations aren't driven by the desire to beat records, but to improve people's lives and the future of the planet by acting swiftly to satisfy the needs of the Away from Home sector.

- Advanced hygiene solutions** that improve product performance while optimising costs and market competitiveness.
- Efficient, more sustainable products** that are fully traceable and guaranteed. Second-life raw materials that turn what would otherwise be considered waste into a new resource.
- Pioneering processes** with a focus on reducing environmental impacts, on simplifying production and improving energy efficiency, on self-production, on purchasing renewable energy, and on minimising waste.

A photograph of a forest with tall, thin trees and green grass in the foreground. A large, semi-transparent circular diagram is overlaid on the image. The diagram is divided into four quadrants by a diagonal line from the top-left to the bottom-right. The top-left quadrant contains the text 'RAW MATERIALS' in white. The top-right quadrant contains the text 'PRODUCTION' in green. The bottom-right quadrant contains the text 'USE' in green. The bottom-left quadrant contains the text 'RECYCLING' in white. The circular arrow is formed by the text 'RAW MATERIALS', 'PRODUCTION', 'USE', and 'RECYCLING'.

Our
sustainability
is circular

**Here at Lucart Professional,
the circular economy isn't just a concept,
but a concrete commitment that guides
everything we do.**

We're determined to create a virtuous cycle in which we innovate processes, rethink products and build a more sustainable future together with our customers and partners.

Our EcoNatural project is a clear example of this commitment, turning waste materials into new opportunities, giving new life to resources and reducing waste.

A four-time platinum rating...

Our concrete commitment to a more sustainable future is reflected in our EcoVadis Platinum rating

We've been awarded the EcoVadis Platinum rating every year since 2022, with excellent scores in all areas: environment, work and human rights, and sustainable and ethical procurement, achieving a score of 96/100 for the environment.

This rating, awarded to only 1% of over 130,000 businesses assessed globally, confirms our commitment to sustainability, transparency and the introduction of responsible practices, helping build a more ethical and sustainable future.

...and a promise for the climate

**Our goal with the SBTi is to reduce
greenhouse gas emissions and contribute
to a more sustainable future**

We also signed up for the Science Based Targets initiative (SBTi) to develop an evidence-based GHG reduction strategy.

By 2026, we'll present specific reduction targets for both the direct and indirect emissions controlled by the company and those generated by the value chain.

The SBTi, in line with the Paris Agreement, aims to keep global warming below 2°C – with a preferential target of 1.5°C – increasing competitive edge in the transition to a low-emissions economy.

SCIENCE
BASED
TARGETS

DRIVING AMBITIOUS CORPORATE CLIMATE ACTION

“

A sense of responsibility towards people, the environment and the future has always guided our choices. A tangible commitment, where facts make a difference.

”

Our contribution to sustainability?

Certified ... and concrete!

Our unwavering commitment to reducing our impact on the planet is testified by leading international certifications that ensure scientific soundness and transparency.

CLIMATE NEUTRALITY

Climate Neutrality refers to the reduction of all greenhouse gas emissions generated during the product's life cycle over a specified period, with any remaining emissions being offset.

PEFC

PEFC certification ensures that the forests supplying the cellulose for the products are managed according to the highest environmental, social, and economic standards.

OK COMPOST INDUSTRIAL

TÜV AUSTRIA OK compost INDUSTRIAL guarantees that a product, including components, inks and additives, is biodegradable and compostable in an industrial composting plant in accordance with the requirements of standard UNI EN 13432.

EU ECOLABEL

EU Ecolabel certifies that products comply throughout the entire life cycle with strict environmental protection criteria shared by all European Union countries: reduced water pollution, reduced air pollution, reduced greenhouse gas emissions and low electricity consumption.

CRADLE TO CRADLE

The Cradle to Cradle Certified® Product Standard assesses the safety, circularity and responsibility of materials and products with a framework that goes across five categories of sustainability performance: material health, product circularity, climate protection, water and soil stewardship and social fairness.

TÜV AUSTRIA OK RECYCLED

TÜV AUSTRIA OK Recycled ensures that a product's recycled content information is reliable, objective and easily identifiable, as required by EN 15343 and ISO 14021.

FSC™

The FSC™ certification mark is applied to products (see catalogue for details) made from forest-derived materials such as paper that are sourced from well-managed forests, verified suppliers, recycled materials or a combination of these sources. FSC™ certification is promoted by the Forest Stewardship Council™.

BLUE ANGEL

Blue Angel is the certification for products and services that meet high environmental, health and performance standards. Products are always assessed from a life cycle perspective.

REMADE IN ITALY®

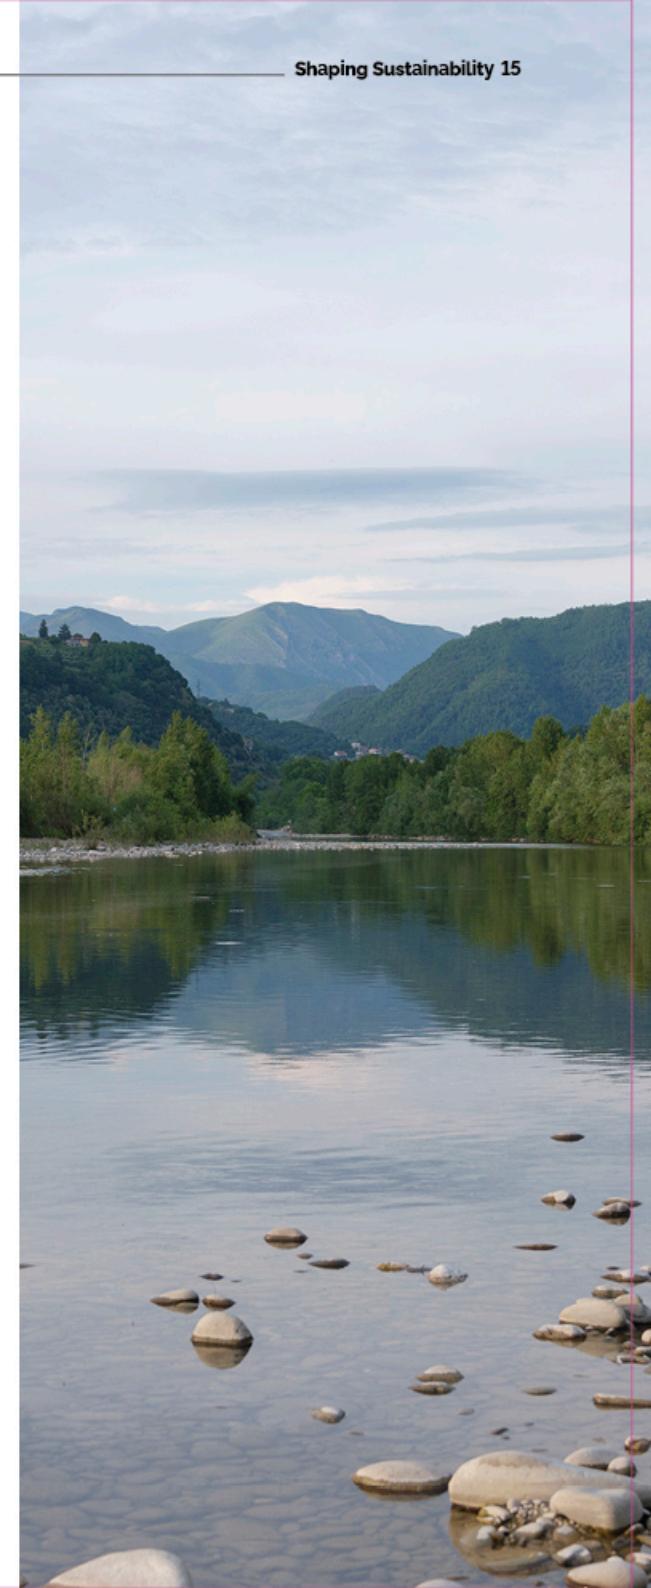

ReMade in Italy® is the first accredited product certification in Italy and Europe to verify the content of recycled material in a product.

Packaging: sustainability inside and out

The Sustainable Packaging Programme demonstrates our commitment to producing ever more sustainable primary and secondary packaging by using recycled and/or recyclable materials.

The aim of this ongoing process is the adoption, where technically feasible, of packaging made from recycled paper or plastic and recycled and recyclable cardboard cores, and the reduction of packaging thickness and process waste.

- 100% RECYCLED CARTONS**
- PAPER WRAP**
- MIN 60% RECYCLED POLYETHYLENE**

Join forces with us!

**Every action counts,
every choice inspires**

We've launched projects to engage with local communities, schools and institutions in order to create a culture of sustainability, promoting the principles of the circular economy.

School project

We've launched a Europe-wide initiative to raise awareness around the principles of the circular economy, educating the new generations on the values of sustainability. We organise discussions and workshops to promote training on circular economy issues for the teachers and students of schools involved in the project.

Giotto project

Giotto is the innovative circular partnership model we've established with companies that use beverage cartons in their production processes. We receive production waste and recycle it in our plants to manufacture EcoNatural products, which we redistribute to partner companies for use and to demonstrate the full circularity of the process.

MMC® model

We promote the Municipal Material Cycle to educate people about recycling, with the active involvement of local communities, the public and the institutions in the creation of a circular flow. We collect and recycle beverage cartons correctly disposed of after use, transform them into new EcoNatural line products, and redistribute them with the support of a local partner to washrooms, sports centres and public agencies in the community.

 FIND OUT MORE ABOUT
THE MMC® PROJECT.

LUCART *For* ME

An exclusive reserved area for our sales network featuring business apps and tools to stay connected with the world of Lucart Professional.

Design Studio

An innovative online tool that lets customers create their own promotional message on flyers or catalogues in line with Lucart Professional communication formats.

Consumption Simulator

This web app estimates the consumption generated using Lucart Professional dispensing systems so that distributors can include this data in their business pitches and send them to the end customer.

Environmental Saving Calculator

It's an online app used to generate certificates of the environmental contribution deriving from the purchase of Fiberpack® products, expressed in terms of the number of beverage cartons recycled, tonnes of CO₂e avoided and trees not used. The calculation method is validated by Ergo, a spin-off from S. Anna School of Advanced Studies.

Innovation in action

Here at Lucart, every innovation must become a concrete hygiene solution that effectively meets the needs of the Away from Home sector, combining product sustainability and performance with cost and waste optimisation and the simplification of work for operators.

THE REAL
CIRCULAR SYSTEM

ECONATURAL

The complete paper and dispenser system produced from recycled beverage cartons.

EcoNatural turns what's no longer needed into a new resource. A unique, technologically advanced production process transforms all the components of beverage cartons into the new raw materials used to make EcoNatural dispensers and paper. A real example of the circular economy!

Beverage cartons not ~~waste~~ are waste

EcoNatural starts life in our plants, where we use a special production process to give new life to all the components in beverage cartons.

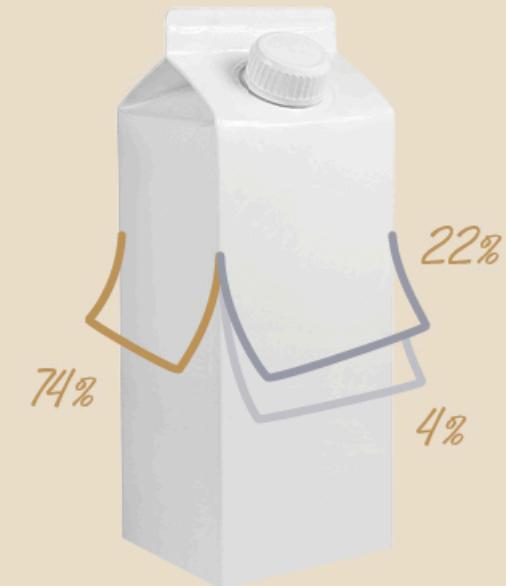

Since 2010, we've been using the recycled cellulose fibres to produce Fiberpack®, the raw material from which we make our EcoNatural paper.

Since 2017, we've been using the recycled aluminium and polyethylene to produce Al.Pe.®, the raw material we use to make our EcoNatural dispensers, now with a new patented design.

EcoNatural is much more than paper and a dispenser, it's a choice that means quality for your customers and responsibility towards the planet.

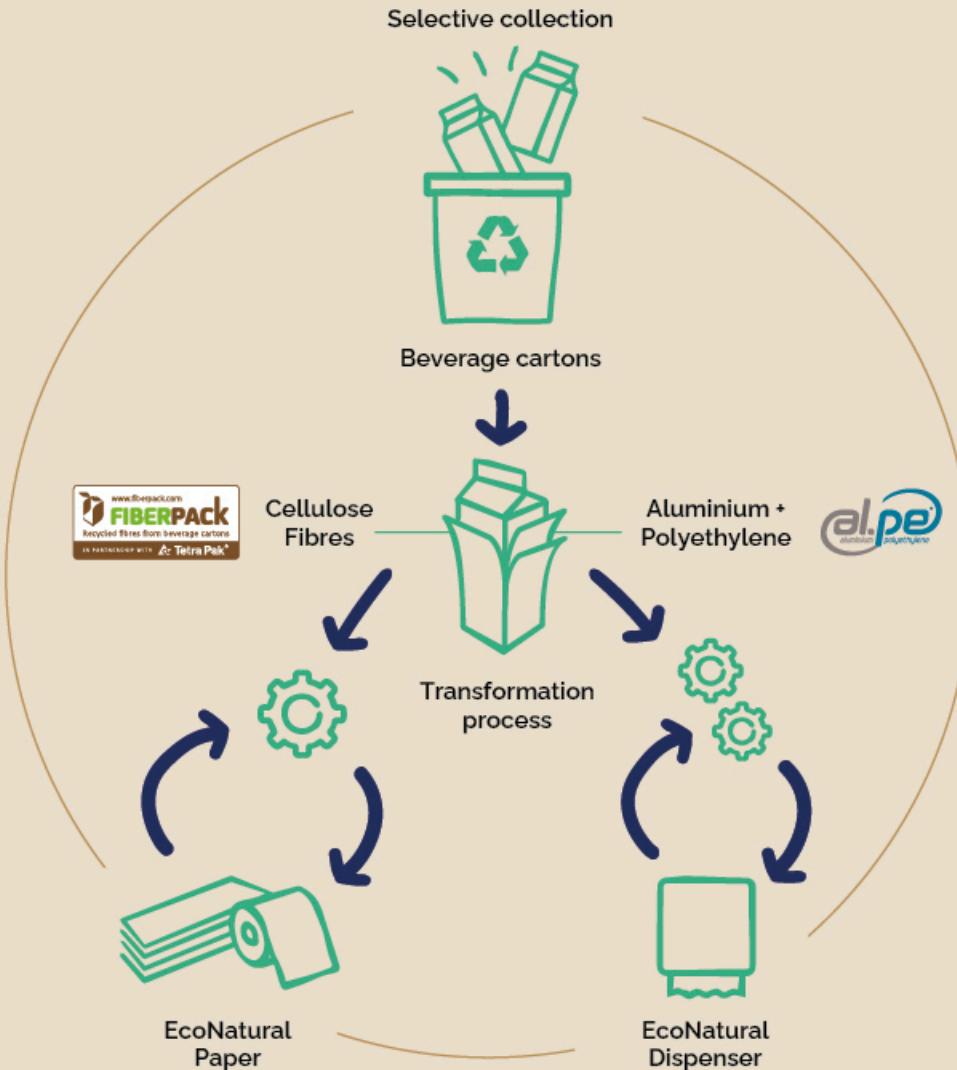

DID YOU
KNOW

The average beverage carton contains **74% cellulose fibres, 22% polyethylene and 4% aluminium**.

As a composite material it's intrinsically difficult to dispose of. At Lucart, using innovative technology based on a physical and mechanical process that involves no harmful substances for humans and the environment, we've managed to separate the different components and transform them into new raw materials from which we make EcoNatural paper and dispensers.

Beverage cartons are a new resource

The EcoNatural range isn't only the result of innovative technology, but also of a system that helps achieve tangible results for environmental sustainability.

In the period from 2013 to 2024, the production of Fiberpack® paper made it possible to recover over 12.5 billion 1L beverage cartons,

which put end-to-end cover a distance equal to 72 times the earth's circumference;

avoided the use of over 5.4 million trees.

or an area equivalent to 18,400 football pitches,

and avoided over 327,000t of CO₂e emissions into the atmosphere.

equivalent to 2,524,000 car journeys from Paris to Frankfurt.

In addition, between 2017 and 2024, dispensers made from Al.Pe.® reused the aluminium and polyethylene in 11.6 million beverage cartons.

This completes EcoNatural's process for transforming all the components in beverage cartons, creating a virtuous system that has become a benchmark for the circular economy in Europe.

EcoNatural is certified...

EcoNatural is sustainable throughout the product's life cycle, as demonstrated by the environmental certifications we've obtained. It's because our sense of responsibility has always guided our choices: a concrete commitment recognised at international level.

PAPER

EU Ecolabel certifies that products comply throughout the entire life cycle with strict environmental protection criteria shared by all European Union countries: reduced water pollution, reduced air pollution, reduced greenhouse gas emissions and low electricity consumption.

FSC™ Recycled identifies products made with recycled paper. FSC™ is an international non-governmental organisation promoting the responsible use of forest resources.

Cradle to Cradle Certified® is the global standard for products that are safe, circular and responsibly made. Cradle to Cradle Certified® assesses the safety, circularity and responsibility of materials and products across five categories of sustainability performance. Cradle to Cradle Certified® is a registered trademark of the Cradle to Cradle® Products Innovation Institute.

The BLUE ANGEL is Germany's best known and the world's first environmental label, created in 1978. It provides consumers, public authorities and industry with reliable information that enables them to specifically request environmentally friendly products and thus promotes ecological product innovations and reduces environmental pollution.

100% of the electricity purchased to produce and process EcoNatural paper is generated from renewable resources.

DISPENSER

ReMade in Italy® is the first product certification in Italy and Europe to determine the recycled material content in finished products. The ReMade in Italy® label also highlights the lower environmental impact of using recycled instead of virgin material.

Certification testing was performed by accredited Bureau Veritas laboratories.

TÜV AUSTRIA OK Recycled ensures that a product's recycled content information is reliable, objective and easily identifiable, as required by EN 15343 and ISO 14021.

...and climate neutral

All EcoNatural line toilet paper and hand towels are **Climate Neutral***.

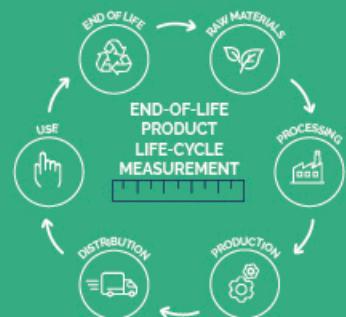

This achievement represents a new start for Lucart as it sets even more challenging emissions reduction targets to fight climate change.

The steps in the process of obtaining Climate Neutrality were based on the PAS 2060 standard and basically involve the measuring, reduction and offsetting of CO₂e emissions throughout the product life cycle.

1 MEASURING

the carbon footprint over the entire product life cycle.

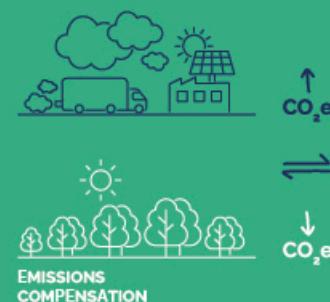

2 REDUCING

emissions through production plant efficiency improvements and optimisation.

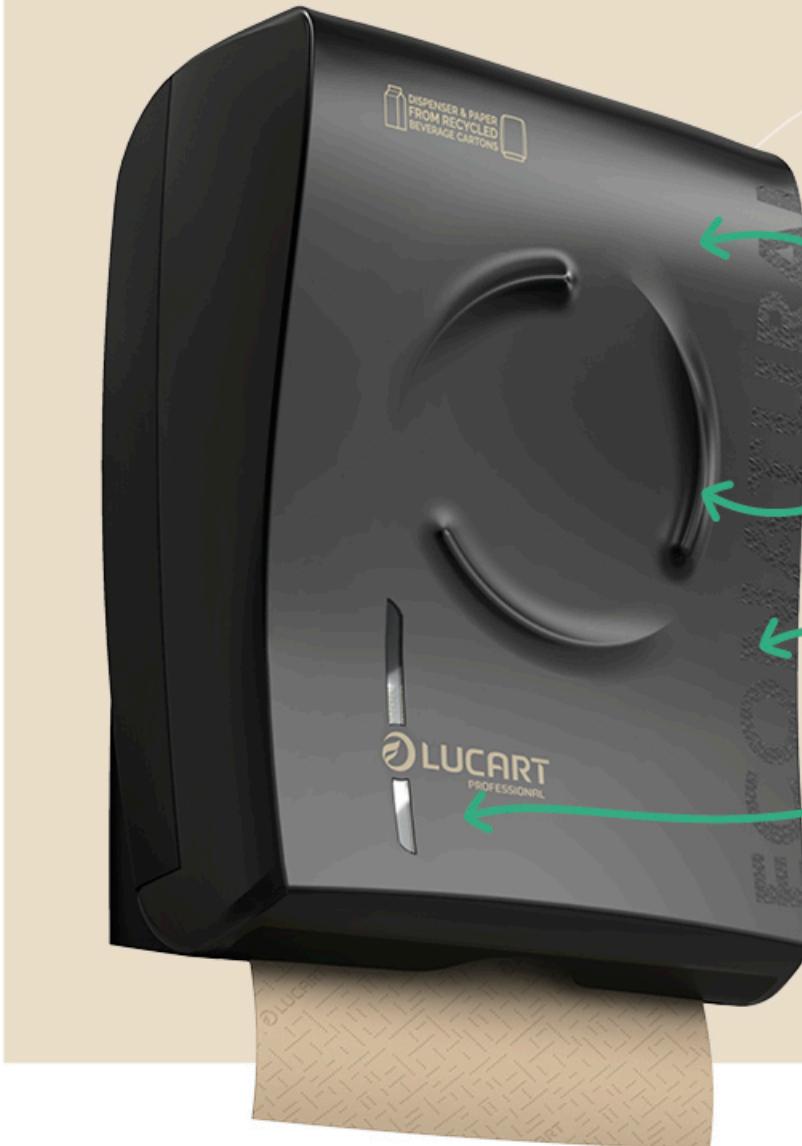

3 OFFSETTING

residual emissions supported by projects with a positive environmental, social and economic impact.

* For products made at the Diecimo and Laval-sur-Vologne plants, the baseline chosen for the Carbon Footprint calculation was 2021, representing the benchmark used to draw up the reduction plan and calculate the residual emissions to offset, according to international standards. For products made at the Aranguren-Artziniega and Nyergesújfalu plants, the baseline chosen for the Carbon Footprint calculation was 2023, representing the benchmark used to draw up the reduction plan and calculate the residual emissions to offset, according to international standards.

DID YOU KNOW

 ReMade in Italy® certification assigns products a class based on the percentage of recycled material they contain. The class to which a product belongs is assigned by the Certification Body based on the percentage of recycled material(s) it contains compared to the total weight.

There are four different classes:

- Class A+: at least 90%.
- Class A: between 60% and 90%.
- Class B: between 30% and 60%.
- Class C: between 0% and 30%.

See page 144

EcoNatural Flow Waste Bin

With its built-in bag holder, the bin looks tidy and hides the waste bag from sight.

EcoNatural paper

The cellulose fibres in beverage cartons are long fibres with special characteristics that give EcoNatural paper its natural softness, absorbency and strength.

The EcoNatural products also have a characteristic light brown colour resulting from the natural colour of the cellulose fibres in beverage cartons.

IDENTITY RANGE

Style born for efficiency

IDENTITY

Dispensing systems where style is driven by efficiency.

A complete range of dispensers for toilet paper, hand towels, soaps and air fresheners, combining elegance and functionality and raising service standards in every area of use.

Style & efficiency

Style that's expressed through the lines drawn on black and white, colours symbolising purity and elegance. Identity gives character to any setting and brings out its beauty with a complete range in two colour variants.

Efficiency that lies in the simple, intuitive mechanism designed to ensure high-quality continuous service, plus savings in terms of both the product, and therefore the cost, and the time required for maintenance. This solution reduces the environmental and economic impact of the service and makes sure users always enjoy a clean and tidy space.

Aesthetics and functionality come together in a design that stands out for the interplay of lines and transparencies, at the same time as reducing consumption and waste.

For every environment

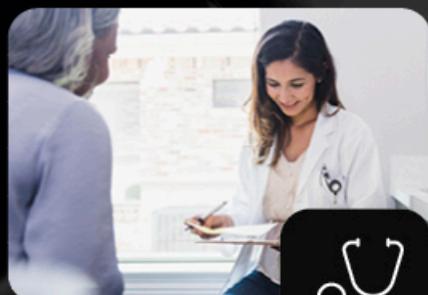

Workplace

Food service

Washroom

Healthcare

Wellness

Sport facilities

For every need

Identity isn't afraid of challenges and one of its points of strength is efficient service. With a comprehensive range and multiple high-performance technologies, Identity has the right answer for visitor flows at any level, even the highest.

Identity Autocut Systems: cutting consumption...

Evolved autocut systems to reduce consumption and waste

The Identity range includes autocut dispensers for hand towels and toilet paper.

The systems have an internal autocut mechanism that dispenses one sheet at a time and requires no batteries or power source. This results in lower paper consumption, reduced waste and savings for the environment and the operator.

-45%* consumption

The autocut system dispenses only the amount of product needed. The optimum sheet length has been defined for both systems to ensure efficient service with the lowest number of sheets.

* Results from market research conducted by Research Factory on a representative sample, compared with a traditional Jumbo Lucart Professional dispenser and a traditional Lucart Professional folded hand towel dispenser. The research was conducted according to ASSIRM regulations in compliance with the ISO 20252 standard. Milan 2015.

... cutting waste!

Stub-roll technology to use the product down to the last sheet

The Identity Autocut Toilet dispenser has a special internal mechanism with a two-roll container that uses the empty roll right down to the last sheet and then automatically switches over to the second. It's a solution that ensures continuous service and reduces waste.

-18 metres of paper*

Combining Autocut technology and the Stub-Roll system results in a saving of up to 18 metres of toilet paper for every roll used.

Identity touch free: no touch, no worries

Touch free technology, 100% hygiene

For areas where hygiene is a priority, Identity offers a touch free hand towel dispenser that avoids exposure to possible contamination by dispensing the product automatically.

If the batteries run out, the practical push-bar system ensures continuous service.

Costs under control

These dispenser parameters can be personalised:

- sheet length;
- sensor sensitivity;
- delay between sheets;
- dispensing mode.

Easy installation and maintenance

LED indicator states:

- blue = correct operation;
- flashing red = low batteries;
- steady red = replace dead batteries.

IDENTITY

Identity single-sheet dispensing system...

Identity L1

The Identity range introduces a new single-sheet toilet paper dispenser: sturdy, easy to use and refill, plus all the benefits of single-sheet dispensing. All without sacrificing Identity's signature design!

*...design to last,
easy to use.*

Identity L1 Double

High traffic? No worries with the new L1 Double dispenser! It holds two rolls at the same time, both in use, thanks to the double paper outlet: twice the paper capacity and twice the availability for guaranteed continuous service.

Double the benefits of single-sheet dispensing with all the style of Identity.

Unique
family feeling

Made to withstand the
toughest environments

Identity Soap

Soap 900: the touch free solution

The unit features touch free dispensing technology and is the ideal solution for areas where hygiene is a priority because it avoids exposure to possible contamination by users.

The dispenser takes 900 ml refills with their own single-use pump.
equivalent to 1,350 doses.

Easy Refill

The soap dispensers in the Identity line are quick and easy to refill...

* Internal test

...only
7"*

Soap 1000 and 400: ideal for large or small areas

Two different pump dispenser formats offering the ideal solution for every need. Soap 1000 has an extended 2,500-dose capacity. Soap 400 is a more compact solution, with a capacity of up to 1,000 doses, contained in a discreet, versatile design.

SOAP 900

The perfect match

For unrivalled hygiene, combine Soap 900 with the touch free hand towel dispenser: the perfect match!

Ease of maintenance

With the LED indicator:

- green = correct operation;
- flashing red = low batteries;
- steady red = batteries dead.

SOAP 1000 AND 400

Hygienic and practical

All refills are designed for simple and easy installation and the soap they contain is sealed for protection by the built-in single-use pump.

Controlled dispensing

Both dispensers deliver a single dose of soap with each pump: the ideal amount for optimum cleansing without waste.

AQUASTREAM

THE NO CLOG PAPER

AQUASTREAM

The no clog paper that takes just seconds to dissolve.

AquaStream is the line of toilet paper and hand towels that dissolve quickly on contact with water, effectively preventing clogged pipes.

AQUASTREAM

Risk of clogging? Solved

A toilet with narrow, winding or low gradient pipes can become easily clogged with traditional toilet paper.

Likewise, a toilet with standard piping can be damaged if a paper hand towel is accidentally thrown in it.

These problems cause inconvenience, including out of service washrooms, dissatisfied users and the cost of restoring service.

The culmination of our experience is AquaStream, the range of toilet papers and hand towels with excellent strength and softness during use, but that dissolve quickly on contact with water, preventing clogging and protecting pipes from blockages.

AquaStream toilet paper

Quality paper that
dissolves in 7**

- Soft and substantial
- Suitable for toilet pipes that are narrow, complicated, with a shallow gradient or that discharge into septic tanks
- Ideal for planes, trains, ships, campsites and beach resorts
- Recommended for high-traffic washrooms in service stations, stadiums, cinemas, etc.

AquaStream hand towels

Quick dissolving if flushed
down the toilet

- Absorbent and strong
- Ideal for washrooms where the toilet is near the washbasin

Designed with careless users in mind!

* Average value of measurements performed on samples of the AquaStream range of toilet papers, in compliance with standard AFNOR NF Q34-020. Test carried out at the Lucart laboratories using a roll of toilet paper with sheet size of 11x9.5 cm.

AquaStream paper dissolves easily...

The reduced dispersion time of AquaStream paper is the result of an exclusive production technology, which creates bonds between the pure cellulose fibres that are stable during use but rapidly dissolve due to the physical and mechanical movement created in the toilet when flushed.

... and naturally!

L-ONE

L-ONE

THE POWER
OF A SINGLE
SHEET

L-ONE

Single-sheet dispensing systems.

L-One is the range of single-sheet dispensers that ensure hygiene, cost control, strength and practicality for both users and operators.

L-ONE

Savings and hygiene with every sheet...

L-One dispensers combine the functionality of single-sheet dispensing with durable materials, and their pared-down design blends into any setting, ensuring savings and hygiene.

They form a range of sturdy, discreet dispensers built for durability and simple to use and refill. An important plus point is being able to forget about them.

...and the strength
to tackle heavy-duty use!

L-One is the perfect ally in areas with heavy usage, where reduced consumption, hygiene and strength are all vital!

L-ONE

Ideal for

Workplace

Food service

Ho.Re.Ca.

Reduced consumption, time and costs

UP TO
-70%*

Single-sheet dispensing reduces consumption, which in practice means:

- LESS WASTE:** less product used, fewer refilling operations.
- LOWER COSTS:** less resources needed for maintenance, refilling and transport.
- SMALLER STORAGE AREA:** less warehouse space required.

More hygiene and safety

The dispensers protect the paper from contamination and single-sheet delivery ensures contact only with the paper used, without affecting the remaining sheets. That's why L-One solutions are ideal for washroom and food preparation areas where hygiene is important.

L-One Mini

The L-One Mini single-sheet dispensers can be refilled with multi-purpose wipers for **guaranteed hygiene and reduced consumption**.

All the benefits of single-sheet dispensing in a **sleek, super compact design**. As a result, L-One Mini is versatile and can **blend into any setting**.

**UNIQUE,
UNIVERSAL**

TEXCELL

TEXICELL

The complete range of dry-process paper products with superior performance.

Texicell products are made using Airlaid technology to ensure excellent strength and absorbency.

The dry-process paper that boosts performance

Exclusive Airlaid technology, which uses air instead of water to process the pulp fibres, and a special 3D web give Texicell rolls and cloths the same absorbency, strength and softness as fabric, but with the hygiene and convenience that only paper can provide.

Texicell products are versatile and reusable, perfect in situations requiring high strength and resistance.

Safe for humans and food products

Texicell products are **dermatologically tested** and **suitable for contact** with foodstuffs.

Ideal for

Workplace

Healthcare

Food service

Beauty & Wellness

1 product with 3 qualities

As strong as cloth

Texicell is a unique product that's as strong as cloth and can be reused

up to 9 times.*

As absorbent as a sponge

Texicell technology and the 3D web mean products can absorb

up to 7 times
their own weight.**

As versatile as paper

Texicell is hygienic, versatile and a good fit anywhere:
industrial kitchens, hair stylists, nursing homes, hospitals, gyms, machine shops.

Double-S embossing

Texicell products have signature double-S embossing. Visible on both sides, it's perfect for picking up more solid or semi-liquid dirt particles thanks to the small perforations created by the design, but also for quickly soaking up liquids.

Source: tests performed by comparing identically sized sheets of Texicell Select, T.A.D. Tissue and standard tissue of average weight.
* 160 N/m, the force required to tear a wet sheet. ** 24.9 grams of water absorbed per sheet.

Texicell: invisible strength, tangible absorbency...

The extraordinary characteristics of Texicell dry-process paper are the result of technology that uses air instead of water to process 100% pure cellulose and obtain a single ply with strong, resilient bonds.

The ply is then treated with a natural resin that further increases its volume and integrity. Unlike the production processes for other types of nonwoven fabric, **no synthetic fibres are used as raw material!**

*...and respect
for the environment!*

PEFC certified

OK compost INDUSTRIAL* certified

No synthetic fibres

*For Texicell products with a GSM of 65 or above, excluding Texicell Power Blue.

perfect The ✓ solution for every area

The Texicell line offers a complete range of rolls and folded products with various GSMS to meet a variety of professional needs in specific sectors.

Texicell (50 g/m²)

Texicell products feature the most versatile GSM, recommended for all areas of use.

Texicell Select (65 g/m²)

The Select extension identifies all products with an intermediate GSM, recommended for all jobs requiring high performance.

Texicell Power (80 g/m²)

The Power extension is used for all high-GSM, high-thickness products: ideal for protecting hands and removing oil, grease and lubricants.

Texicell Power Blue: the ultimate

Texicell Power Blue is for stubborn dirt in professional environments. The product's high-GSM, extra-thick 3D web and superior absorbency make it **ideal for protecting hands and for industrial applications** such as removing oil, grease and lubricants or food scraps, or for quickly absorbing any type of liquid.

Ideal for

Workplace

Food service

Ultra resistant

With their high level of strength, Texicell Power Blue cloths are the best in **heavy workloads, removing dirt and grease** while protecting hands.

Ultra absorbent

Txicell Power Blue cloths have a high level of **absorbency of liquids and oils**: efficient like a sponge, thick and strong like fabrics, flexible in use like paper.

Ultra versatile

Txicell Power Blue is ideal for **heavy-duty and industrial uses and professional cleaning**, for washing and drying a wide range of surfaces.

High-performance rolls and cloths

Folded multi or single-purpose cloths for beauticians and hair stylists, folded hand towels, and rolls of versatile and reusable professional cleaning cloths. Perfect in situations requiring deep cleaning or high absorbency.

Sustainable and efficient tissue solutions

Lucart Professional offers a broad range of tissue paper (made with recycled or virgin fibres) and Airlaid paper products. Multiple solutions with the sole goal of ensuring reliability, performance and sustainability.

ECONATURAL

EcoNatural is the only line of paper products made by **recycling the cellulose fibres** in used beverage cartons. All EcoNatural products are **EU Ecolabel** and **FSC™ Recycled** certified.

ECO

Eco is the line produced with **100% recycled and regenerated fibres**. A broad range of products that combine quality and respect for the environment to meet every need. All Eco line products are **EU Ecolabel** certified.

STRONG

Strong is the complete line of products made from **virgin cellulose fibres** in accordance with the environmental sustainability criteria established for **PEFC** forest certification. It's the solution that offers high-performance results and excellent quality.

AQUASTREAM

AquaStream is the line of toilet paper products and hand towels that **dissolve in seconds** if flushed down the toilet. Produced with **PEFC** and **EU Ecolabel** certified virgin cellulose, it's the perfect solution to prevent clogging.

TEXICELL

Texicell is the line of **Airlaid** technology **dry-process paper** that delivers high performance using air to process the pure cellulose fibres. The products are also **PEFC** certified.

EASY

Easy is the line of eco-certified tissue paper produced with **100% recycled cellulose fibres**. A complete solution with excellent cost-effectiveness.

SKYTECH

SkyTech is the **recycled line** characterised by the distinctive **blue colour**.

Strong Power Blue: The ideal paper for difficult challenges

Strong Power Blue is the line of tissue paper cloths with above average dry strength. Made without using plastic fibres, these cloths are **ideal for cleaning oil and grease and for use with detergents and solvents.**

* In-house tests performed in compliance with Standards UNI EN ISO 12625-4 and 12625-8.

The complete line of skincare products made by Lucart

A range of certified and dermatologically tested soaps
made by Lucart for hygiene in all situations.

Natural quality ...

We've developed a broad range of cleansers that meet the diverse needs of customers who are increasingly conscious of personal hygiene and quality. The entire range is produced in Lucart group factories, ensuring quality and control over the supply chain. All the soaps contain natural ingredients and are biodegradable and vegan.

... certified quality

EU Ecolabel

Biodegradable

Dermatologically tested

Vegan

For every need!

Different textures and a variety of scents and fragrances, from rich and sophisticated to neutral and versatile, offering the choice of the most suitable solution for any specific use.

HAIR & BODY

**HAIR & BODY FLORAL FRAGRANCE**

Gel soap enriched with **Ginkgo Biloba extract**, known for its emollient, purifying and toning properties. Packed with **vitamins** and **antioxidants** and dermatologically tested, it's ideal for gentle cleansing of body and hair.

EVERYDAY

**CLASSIC FOAM WITH ALMOND OIL**

A foamy hand soap enriched with **almond oil**, which is well known for its emollient properties. Dermatologically tested, it **gently nourishes** and **revitalises the skin**.

**FREQUENT FOAM WITH ALOE VERA EXTRACT**

A hypoallergenic foamy hand soap enriched with **aloe vera extract**, known for its energising, moisturising and purifying properties. With its neutral fragrance, it is also ideal for use in settings such as food preparation areas.

EVERYWHERE

ANTIMICROBIAL FOAM HAND SOAP

Antimicrobial foam hand soap (biocidal). The foam formulation results in **faster washing** and it **rinses off easily** helping to save water. Formulated at the natural PH of the skin, with no fragrances or colouring, it ensures **maximum versatility of use**.

PREMIUM

PREMIUM LIQUID WITH ARGAN OIL

A liquid formula with a **smooth and creamy texture** and an **elegant scent of camellia**, which make it ideal for spaces where quality and well-being are of utmost importance.

ESSENTIAL FOAM WITH NEUTRAL FRAGRANCE

A foamy hand soap with a neutral fragrance, providing a **pleasant feeling of freshness and cleanliness**. It is dermatologically tested and gentle on the skin. It is versatile enough to be used in any context.
